

## What's it worth?

### Tree valuation methods in the UK

A unique opportunity to contrast and compare the four main tree valuation methodologies currently in use in this country, and to understand their distinct purpose and application. The day will be presented by the key experts and proponents of these systems, whose knowledge and understanding of the respective methods is second to none.

### The four methods and course tutors:

- The Helliwell System – Rodney Helliwell
- CAVAT – Chris Neilan
- CTLA – Adam Hollis
- i-Tree – Kenton Rogers

### Course programme: 09.30 – 16.00

Each presenter will describe the relevant system and explain its origin and intended application, with opportunity for questions and discussion. Each will also value two 'example trees' using their system, so that a direct comparison can be drawn and the intricacies of the differences between them can be explored.

### Dates and Venues:

<b>14 July</b>	<b>Wokingham, Berkshire</b>
<b>29 September</b>	<b>Ilminster, Somerset</b>
<b>13 October</b>	<b>Stoneleigh Park, Warwickshire</b>

<b>AA Members:</b>	<b>£180.00 + VAT</b>
<b>Non-members:</b>	<b>£200.00 + VAT</b>
