

**Bill Newton Dunn**, East Midlands Member of European Parliament visits baobab in Africa and puts question to European Parliament.

'Are the Commission aware that under the Habitats Directive there is no equivalent designation to the Boreal zone's 'Fennoscandian wooded pastures' in other EU zones, despite wood pasture sites of equal community interest existing in Atlantic and Continental Europe? Can the Commission outline whether it is prepared to amend Annex I of the Habitats Directive to either extend the existing 9070 Fennoscandian wooded pasture definition to the Atlantic and Continental zones, or to include a new definition of wooded pastures for the Atlantic and Continental zone member states?'
